„People affected by a Covid 19 infection even months later still have physical and psychological problems and experience prolonged states of stress. They complain, for example, of tiredness, exhaustion, nausea, anxiety, depression or post-traumatic stress syndrome. The main objective of our post-COVID programme is to restore normal psycho-physical balance and to get back into shape and vitality. We begin with a detailed and personalized medical consultation, in which symptoms and complaints are identified and a personalized treatment plan drawn up.“

Dr Andrea Rainer, specialist in physical medicine and medical director at VIBE Private Therapy

Experience nature. **The Warmbad spa park**

The spa park has always been in the care of the family that owns it. Mr Ludwig Walter, an ancestor of the owner family, began to turn what was then a pasture area into a park. The design of the park itself was based on an idea of the spa physician Dr Trippolt, who spent six months of the year in Opatija. There, Dr Trippolt discovered a beautiful park that inspired him. Based on this idea, the Warmbad spa park was created and designed. The idea behind the creation of the park was to give visitors the opportunity to stroll and relax in the thermal park after their treatments.

The natural state of the park as it is today is the result of a successful cooperation between Warmbad's forestry, agricultural and nursery sectors. In recent years, all those involved have successfully implemented the transformation from a strict floral arrangement to a natural and bee-friendly meadow. Particularly rewarding is the cooperation with the Dobratsch Mountain Nature Park.

The Warmbad spa park is located at the foot of the Dobratsch Mountain Nature Park and covers just over four hectares with hiking trails, flower arrangements and designated areas for therapy and relaxation. The park offers a wide range of trees and habitats, as well as traditional flower and herb plants. This natural idyll invites hotel guests

This natural idyll invites hotel guests and residents to relax, stroll and spend time in nature.

Feel nature. **Green Flag Award®**

The international quality award for parks and green spaces was awarded for the first time in Austria. On June 26th 2023, the 'Warmbader Naturpark' received the 'Green Flag Award'. This award recognises above all the long-standing commitment to the preservation of old trees and plant species and, in the case of Warmbad-Villach, the combination of art and nature. Thanks to this unique combination of art and nature, the Warmbad-Villach spa resort decided to apply for the 'Green Flag Award'. This is a seal of quality for parks: the gardens and parks to be assessed are carefully examined according to strict, British criteria with regard to the state of maintenance, cleanliness, public accessibility, barrier-free access, user orientation, park management, marketing and much more.

Protecting nature. **Environmental awareness**

The omnipresent topic of sustainability is also not neglected at the Warmbad-Villach spa resort. Thanks to a 1,500 m² photovoltaic system, around 333 MWh of solar energy is produced annually for the resort's own consumption, which corresponds to the annual consumption of 50 single-family households. In addition, all lamps are gradually being replaced by LEDs and the waste water from the spa is used for energy recovery. In addition, the resort operates its own agricultural estate and relies on regionally sourced products in the gastronomy sector as well.
